

## Eat a pizza, Fluffy the Vulture!

Fluffy the Vulture, by William Zicker

<http://FluffyTheVulture.com>

1) Defense: eat pizza slices (color in) to earn coins. draw added coins next to the two you start with on each row.

2) Offense: spend coins (color in) to buy opponents' slices

3) Play: count number of coins spent by each player on each row. number to left of left bracket is what you are spending, number to right of right bracket is what opponent is spending. color in remaining coins, then slices, for each coin spent by opponent on each row.

4) Score: count number of remaining slices on each row, write the number between the two brackets, and multiply by 1 on first row, by 2 on second row, and by 3 on third row. add the results for all three rows. **Highest score wins!**
